CLEANING

for this one we struggled with some numeric data ot datum that pretend to be un_numeric "475" if you get what I mean other than that its normal cleaning day.

I learned a lot about lambda in PY

and that apply that goes with it when DFs

and tha importance of keeping data

it's cool i was very annoyed by that one datum that scraws my work but I learned from it thank you sir or Maddame if you are reading me in that super small line size.

see you next project
